

StableFx Mainnet Reference

Target fiat-stablecoin basket for the Forex Telaraña spoke deployments

AUTHOR	PURPOSE	DATE
Tomás Cordero — BUFI	Hub-and-Spoke FX engine	14 May 2026

This is a snapshot of the regulated fiat-stablecoin landscape I've been mapping as candidate spokes for **Forex Telaraña Protocol** — a Hub-and-Spoke cross-currency money market on Arc, with USDC as the canonical settlement asset routed over CCTP V2. For each issuer I've listed verified mainnet deployments, open inquiries with the issuer, and any integration caveats. Anything marked **awaiting reply** reflects an outbound email I've sent and not yet had answered.

● Verified mainnet
● Awaiting issuer reply
△ Caveat / read note
× No public deployment

AUDF · Australian Dollar

Issuer: Forte · 6 decimals · Same address across all EVM deployments

Network	Status	Contract address
Ethereum	● Live	0xd2a530170D71a9Cfe1651Fb468E2B98F7Ed7456b
Polygon	● Live	0xd2a530170D71a9Cfe1651Fb468E2B98F7Ed7456b
Avalanche C-Chain	● Live	0xd2a530170D71a9Cfe1651Fb468E2B98F7Ed7456b
Base	● Live	0xd2a530170D71a9Cfe1651Fb468E2B98F7Ed7456b
Redbelly	● Live	0xd2a530170D71a9Cfe1651Fb468E2B98F7Ed7456b
Testnet	● Pending	Awaiting reply from Forte

BRLA · Brazilian Real

Issuer: Avenia · 18 decimals

Network	Status	Contract address
Polygon	● Live	0xe6a537a407488807f0bbeb0038b79004f19dddfb
Ethereum · Base · Celo · Moonbeam · Gnosis	● Pending	Awaiting reply from Avenia
Testnet	● Pending	Awaiting reply

JPYC · Japanese Yen

Issuer: JPYC Inc · 18 decimals (mainnet) · 6 decimals on Sepolia (unofficial)

Network	Status	Contract address
Ethereum	● Live	0x431D5dfF03120AFA4bDf332c61A6e1766eF37BDB
Polygon	● Live	0x431D5dfF03120AFA4bDf332c61A6e1766eF37BDB
Avalanche C-Chain	● Live	0x431D5dfF03120AFA4bDf332c61A6e1766eF37BDB

Network	Status	Contract address
Ethereum Sepolia	△ Unofficial	0xd3eF95d29A198868241fE374A999fc25F6152253

△ Sepolia deployment uses 6 decimals vs 18 on mainnet — confirm with JPYC Inc before integrating.

KRW1 · Korean Won

Issuer: BDACS

Network	Status	Contract address
Avalanche C-Chain	● Live	0x25a8ef2df91f8ee0a98f261f4803a6eab5ff0318
Plume	● Live	0x8304d1b1d04c968270ae66a0c7758f7471b8ec3f
Polygon · Ethereum · BNB · Aptos · Arc	● Pending	Awaiting reply from BDACS
Testnet	● Pending	Awaiting reply

MXNB · Mexican Peso

Issuer: Bitso / Juno · 6 decimals · Same address across EVM deployments

Network	Status	Contract address
Arbitrum One	● Live	0xF197FFC28c23E0309B5559e7a166f2c6164C80aA
Ethereum	● Live	0xF197FFC28c23E0309B5559e7a166f2c6164C80aA

Testnet	✗ None	<i>No active deployment — Frank's project, ping him directly</i>

QCAD · Canadian Dollar

Issuer: Stablecorp

△ **QCAD relaunched on 20 Nov 2025 under a new prospectus.** Pre-relaunch tokens are explicitly excluded from the new trust structure — do not integrate the legacy contract. The legacy address uses 2 decimals.

Network	Status	Contract address
Ethereum (legacy, pre-Nov 2025)	△ Deprecated	0x4a16baf414b8e637ed12019fad5dd705735db2e0
Ethereum (post-relaunch)	● Pending	<i>Not published — contact Stablecorp</i>
Stellar	● Pending	<i>Not published — contact Stablecorp</i>
Algorand	● Pending	<i>Not published — contact Stablecorp</i>
Testnet	✗ None	<i>No public deployment</i>

ZARU · South African Rand

Issuer: ZAR Universal Network · Launched 3 Feb 2026 · Solana-only · Institutional access only (Luno, EasyEquities)

△ **Do not confuse ZARU with xZAR (0x48f07301e9e29c3c38a80ae8d9ae771f224f1054) on Ethereum — distinct issuer, distinct asset.**

Network	Status	Contract address
Solana (SPL mint)	● Pending	<i>Not yet public — institutional rollout, contact ZAR Universal</i>
Testnet	✗ None	<i>No public deployment</i>

Integration priorities for the Avalanche and Arc Testnet target list as interconnected hubs: JPYC and BRLA are the two anchor spokes for the first FX trials (deposit USDC, borrow JPYC or BRL). MXNB and AUDF are second-wave given their multi-chain footprint and 6-decimal alignment with USDC. PHPC and ZCHF are useful for the SEA and CHF basket; QCAD is on hold until the post-relaunch contract is published. For chains where no native issuance exists on Arc Testnet, I'll stub MockERC-20s with matching decimals and issuer metadata until canonical deployments arrive.
